SECRETARY'S REPORT

November, 1989

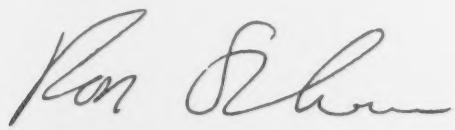
To the Governor, Legislature, and People of South Dakota:

Taxes and tax collection seemed to be in the news more during the past year than in recent memory. The recently defeated initiated property tax measure, Dakota Proposition II, has spawned several studies, and many proposed changes to the tax structure are being discussed in the legislative halls.

The tax system in South Dakota is complicated and difficult to understand. With this printing of the Annual Report of the South Dakota Department of Revenue, we hope to 1) aid those individuals who are studying taxes in South Dakota, and 2) help the State's citizens understand the taxes they pay by presenting information in a graphic, uncomplicated form.

We trust our goal has been met.

Sincerely,



Ron Schreiner
SECRETARY OF REVENUE

TAX REVENUES BY CATEGORY AND DISTRIBUTION

The South Dakota Department of Revenue is the principal agency of tax administration for the state of South Dakota. While there are 42 different state taxes collected by the department, they can be grouped into four main categories: sales, use and contractors' excise taxes, motor fuel taxes, motor vehicle licensing and special taxes. The total revenues from these taxes in fiscal year 1989 was $496,520,598. That amount compares with revenues of $506,432,934 in fiscal year 1988. A breakdown of total revenues by category of tax is shown in the chart below.

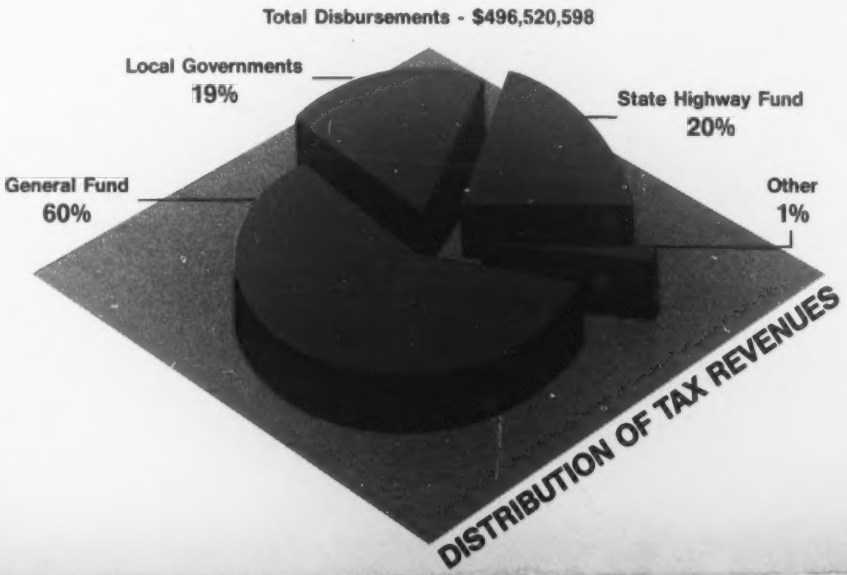
TAX REVENUES BY CATEGORY

The Department of Revenue collected 61% of its revenues from sales, use and contractors' excise taxes in fiscal year 1989.

Once collected, tax revenues are distributed to three primary locations: the state's general fund, local units of government and the state highway fund. The chart below shows the percentage of the total taxes received by each group.



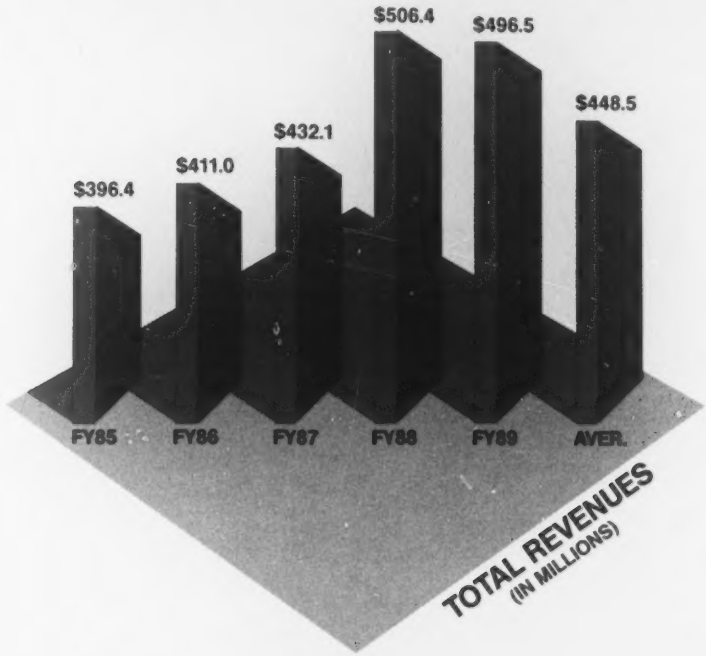
The state's general fund received 60% of the department's total collections.

AN OVERVIEW OF TAX REVENUES

Total Revenues

Revenues collected by the department from taxes and licensing fees totaled $496,520,598 in fiscal year 1989. This amount is a decrease of $9,912,336 from last year's revenues of $506,432,934. The major source of this revenue, sales, use and contractors' excise taxes, decreased by $21,144,368. Revenues from fuel taxes increased by $14,512,726; motor vehicle licensing fees increased by $9,949,265; and special tax revenues increased by $3,034,297. The two charts below illustrate the change in total revenues over a five-year period.

TOTAL REVENUES: A FIVE YEAR COMPARISON



Fiscal year 1989 revenues were $48,042,247 above the five-year average.

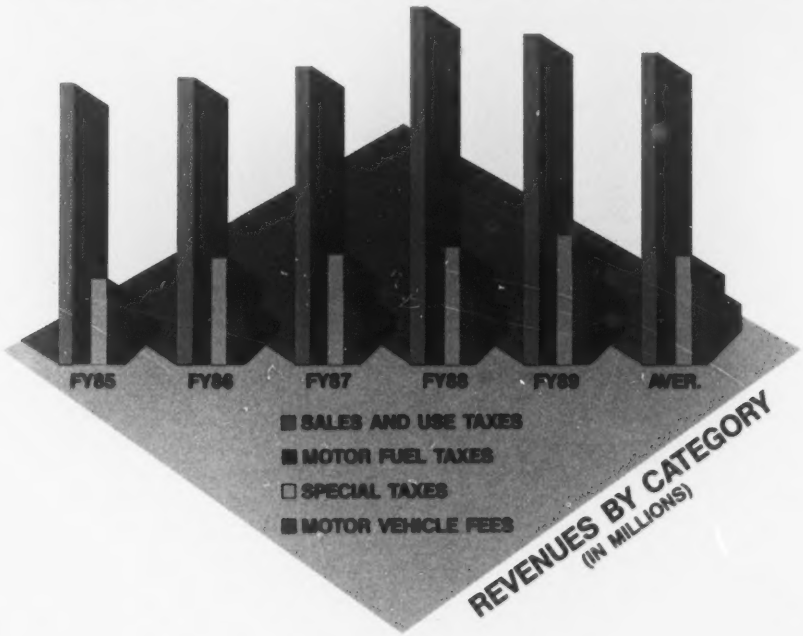
The percentage change in revenues from 1985 to 1989 is a plus 25%.

Total Revenues		
Fiscal Year	Total Revenue	Percent of Change
1985	$396,371,996	2.68%
1986	$410,981,487	3.69%
1987	$432,084,741	5.13%
1988	$506,432,934	17.21%
1989	$496,520,598	−1.96%
Five Year Average	$448,478,351	N/A

A five-year comparison between the revenues from the four major tax categories shows a consistency in the dollars generated by each category. Sales taxes have clearly been first, and motor vehicle fees have produced the least revenue. Special taxes have ranked second in revenues every year except 1985 and 1989.

Revenues By Category

REVENUES BY CATEGORY: A FIVE-YEAR COMPARISON



Sales, use and contractors' excise taxes make up almost 61% of the department's total revenues.

Sales tax revenues in 1989 increased 4.4% over fiscal year 1988. The drop in total revenues is due to the repeal of the special, one-year economic development tax.

A Comparison of South Dakota's Taxes with Surrounding States

While the following chart gives a good indication of the relative rate of taxes in each state, it does not reflect all the variables. For example, while South Dakota applies its sales tax to most services, other states may not.

The chart above illustrates the differences in the rate of taxes among states in the region. The chart below shows how those rates affect individual taxpayers and compares this effect with the rest of the nation. In 1985, South Dakotans paid an average of $1,043 per person in state and local taxes. This compares with $241 paid twenty years earlier. The national average in 1985 was $1,465, leaving only five other states with taxes lower than South Dakota's.

South Dakota ranks 45th nationally in taxes assessed per person.

Distribution of Taxes

In fiscal year 1989, the department collected $496,520,598 in taxes. Those dollars were then distributed to various funds and units of government. The largest portion of the revenues, 60%, is deposited in the state's general fund. The chart below shows the taxes that produce the revenues and the manner in which the revenues are distributed.

The general fund receives a portion of the revenues from most taxes.

[1] The state retains a minimum administrative fee; which varies from 1.25% to 1.8%.

[2] Revenue from reservation taxes is distributed to the reservation on a proratable basis based on the percentage of Indian population on the reservation and a proratable percentage is retained by the state based on the percentage of non-Indian population on the reservation. The state also retains 1% of the revenue credited to reservations as an administrative charge.

[3] An exception exists regarding banks organized pursuant to SDCL 51-16-40 to 51-16-44, inclusive. 95% of the revenue derived from that tax is deposited into the State General Fund and 5% to the county where the bank is located.

[4] Revenues from mining companies licensed after January 1, 1981, are split as follows: 80% to the state, 20% to the county of production (subject to a $1 million cap)

[5] If the energy development fund has a balance of less than $100,000 then one-sixth (1/6) of the revenue is deposited in that fund until the balance reaches $100,000.

[6] Revenue from devices located outside municipalities is deposited into the State General Fund. If the amusement device is located within the boundaries of a municipality then the revenues are remitted to the municipality.

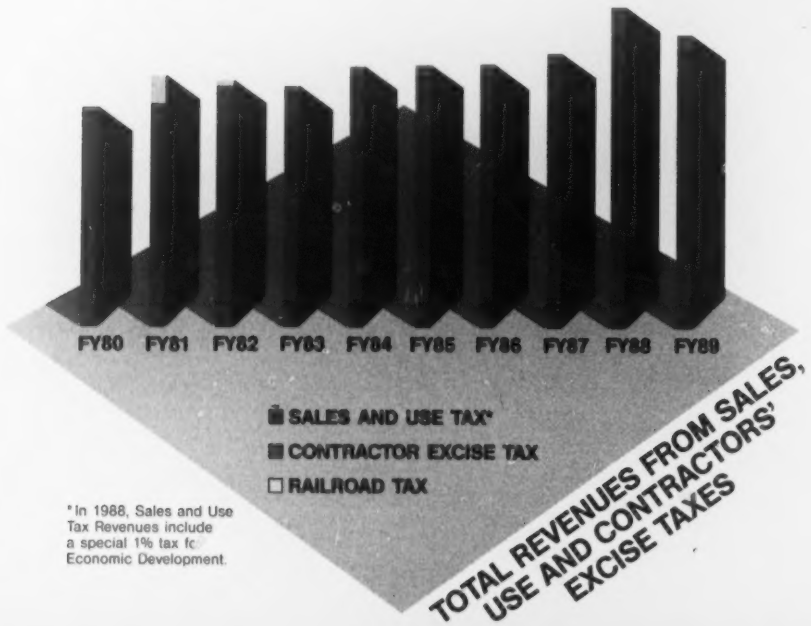
SALES, USE AND CONTRACTORS' EXCISE TAXES

Sales, use and contractors' excise taxes produce the largest portion of the state's tax revenues. These revenues come from 44,215 businesses that currently pay sales, use and contractors' excise taxes on their products or services. Revenues from sales taxes made up over 61% in fiscal year 1989.

Total Revenues



In fiscal year 1981, South Dakota had a state railroad tax. This 1% tax was added to the state sales tax. Revenues from the tax were used to purchase railroad property.

Sales tax revenues in 1989 increased 4.4% over fiscal year 1988. The drop in total revenues is due to the repeal of the special, one-year economic development tax.

Sales tax revenues have increased an average of 7% per year over the last ten years.

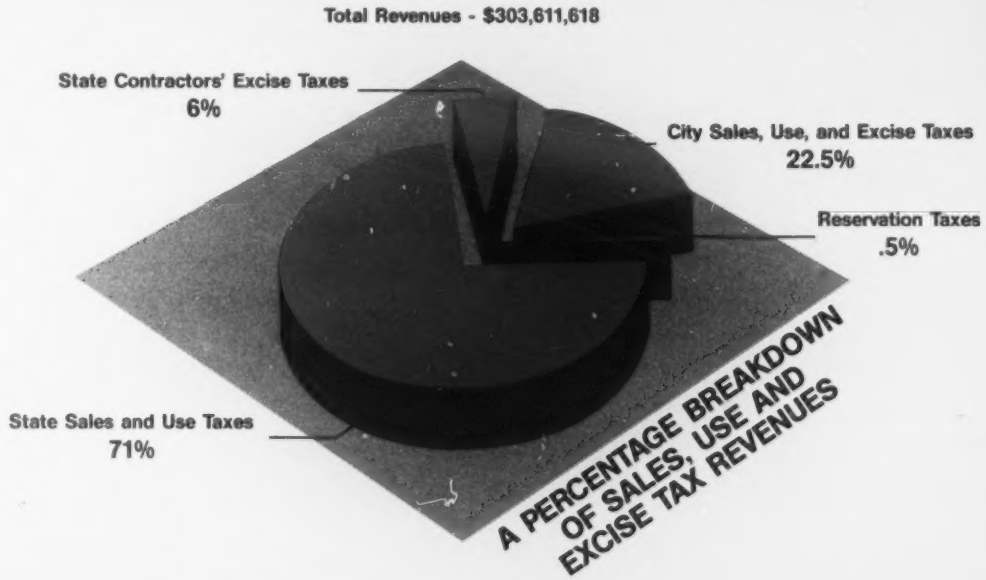
Fiscal year 1988 and 1989 figures are influenced by $40 million in revenues from the special, one-year economic development tax.

A Percentage Breakdown of Sales, Use and Contractors' Excise Tax Revenues

In fiscal year 1989, sales, use and contractors' excise taxes in South Dakota totaled $303,611,618. Within this category are four types of tax: state sales and use taxes, state contractors' excise taxes, city sales, use and contractors' excise taxes and reservation taxes. The pie chart below illustrates the percentage of the $303 million in total tax produced by each tax type.

Total sales tax revenues broken out by tax types.

City sales tax revenues increased by 12.7% in fiscal year 1989.



Municipal and Reservation Taxes

While cities and Indian reservations set their own tax rates, the administrative task of collecting municipal and reservation taxes is performed by the Department. The dollars are then redistributed to the taxing units based on the amount collected from each city or reservation.

Sales tax revenues do not necessarily indicate the level of economic activity, since municipalities and Indian reservations vary in their tax rates and the size of their tax bases.

Special Tax revenues have increased 55% over the last ten years.

The Special Tax category can be divided into four major types: bank franchise taxes; inheritance taxes, alcohol taxes and cigarette taxes. The pie chart below illustrates the percentage of revenues produced by each type of tax.

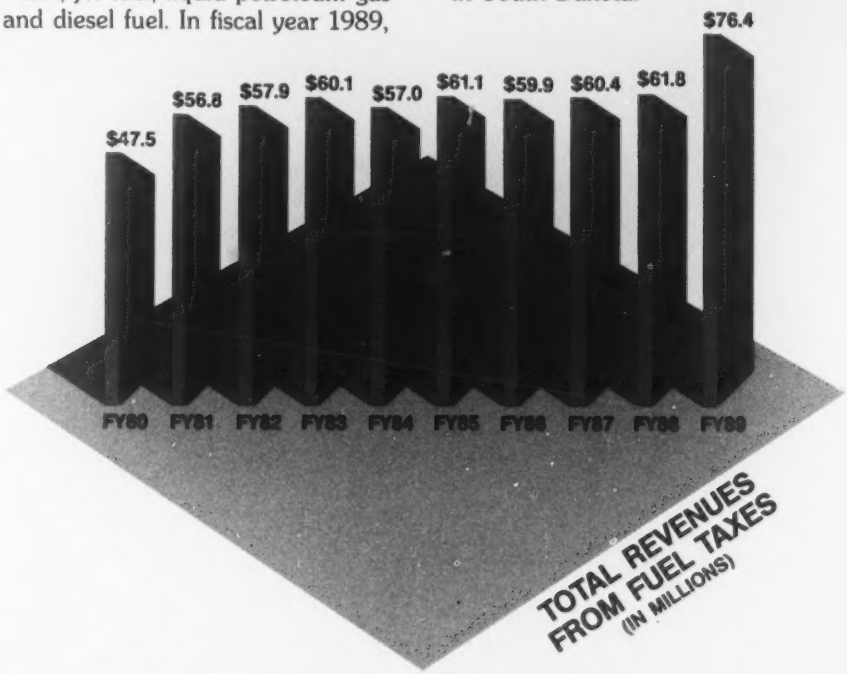
FUEL TAX AND MOTOR VEHICLE LICENSING

Total Fuel Tax Revenues

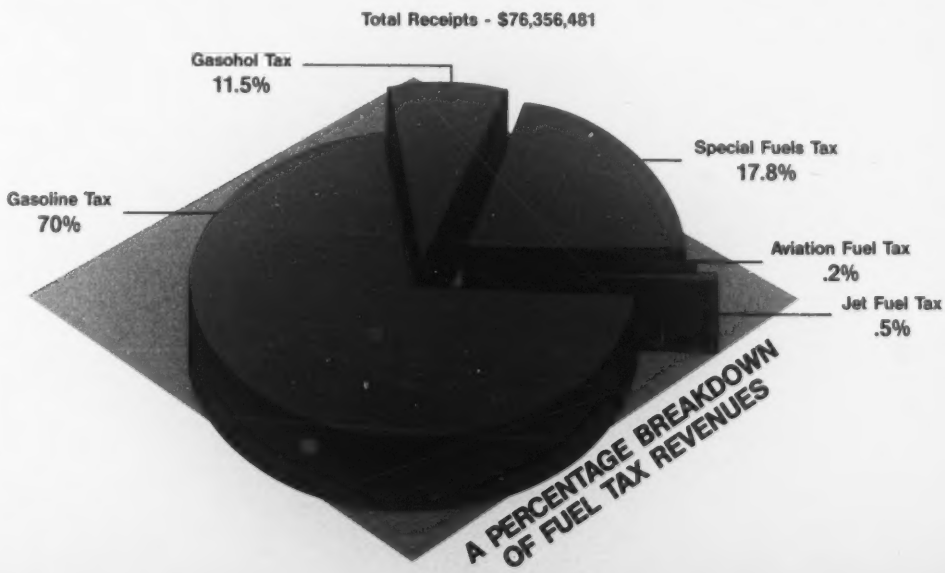
Fuel taxes include taxes on gasoline, gasohol, aviation fuel, jet fuel, liquid petroleum gas (LPG) and diesel fuel. In fiscal year 1989, there were 1,466 licensed fuel distributors in South Dakota.

Total fuel tax collections prior to refunds.



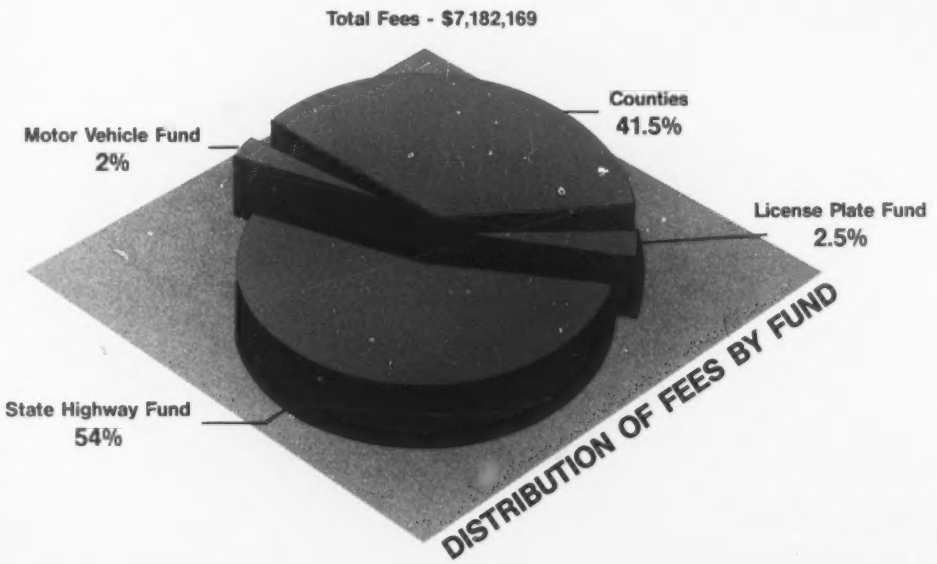
Of the five types of fuels sold in South Dakota, gasoline is by far the most significant, producing 70% of the total fuel tax revenues in fiscal year 1989. The chart below illustrates the percentage of the total fuel tax revenues produced by each type of fuel.

In fiscal year 1989, gasoline taxes generated 70% of the total fuel tax revenues.



Prorate and Port of Entry Fees

Prorate and port of entry fees are licensing fees levied on commercial motor carriers doing business within the state. The amount of the fee is determined by the number of miles the carrier travels within the state. Over 95% of the fees are used by the state and counties to maintain public roads.



Total revenues during fiscal year 1989 were $7,182,168. Of this amount, 54% was used to maintain state highways, 41.5% was used to maintain county highways, 2% went to the State Motor Vehicle Fund and 2.5% to the License Plate Special Revenue Fund.

Titles and Registrations

Any vehicle operated on South Dakota's roadways, including mobile homes, trailers and snowmobiles, must have a title verifying ownership. If used on public roadways, the vehicle must also be registered. Registration is confirmed by the issuance of a license plate.

Property taxes in South Dakota are part of a larger system of taxation that includes sales taxes, fuel taxes, motor vehicle licensing and a wide variety of special taxes. Property taxes are, however, local taxes. They are the primary source of dollars for school systems, counties, municipalities and other local government units. Consequently, their administration is a local responsibility. The authority of the Department of Revenue is limited to assisting local government units in making property tax assessments that are fair and in compliance with the law. The department does not collect or use property taxes.

How Property Taxes Are Applied

Property owners in South Dakota may be taxed by two or more of the following units of government: cities, counties, townships, school districts, water districts and, in some cases, units such as fire and sanitary sewer districts. There are, however, three steps that are common to the application of property taxes in each governmental unit.

(1) Establishing the Value of Property

The first step is to establish the value of all the property within the boundaries of each unit of government. Because all property is not of equal value, individual values are arrived at based on the price the property would bring if sold. This selling price, determined by the sale price of comparable properties and known as the true and full value, is what establishes the value of the property.

(2) Establishing the Amount of Tax

The second step is to determine the amount of taxes needed to meet the cost of operating a unit of government. The higher the cost of operating the city or school district, the larger the revenues required from property taxes. Revenues from property taxes, combined with other monies such as federal grants, must equal the size of the budget of the unit of government.

(3) Establishing a Tax Rate

The third step, establishing a tax rate to apply to individual pieces of property, is based on steps one and two. The tax rate for all property in a local unit of government is arrived at by dividing the value of all the property into the amount of the budget that is unfunded from other sources.

This calculation results in a tax rate expressed in dollars of tax per thousand dollars of property value, or "dollars per thousand." If the dollars per thousand were $4, the tax on a home valued at $50,000 would be calculated at $4 X 50 and would result in a tax of $200.

In practice, all the tax rates that apply to a property are added together, resulting in a single tax levy. This single levy, however, is always the product of two or more tax rates assessed by different government entities as illustrated on the top of the next page.

Local Units of Government Taxing A Hypothetical Parcel of Property

Property "X" taxed at a rate of $74.18 per thousand dollars of taxable value

Unit of Government	Amount of Tax
School District Tax	$41.44 per thousand
County Tax	11.85 per thousand
City Tax	20.64 per thousand
Township Tax	0 per thousand
Water District Tax	0.25 per thousand
Fire District Tax	0 per thousand
Sanitary District Tax	0 per thousand
TOTAL	74.18 per thousand

Property Tax Variables

Three major variables affect the taxes on individual pieces of property:

1. the size of the combined budgets of the governmental units taxing the property;
2. the value of all the property in the governmental unit;
3. the value of the individual piece of property.

A change in any one of these three variables will change a property owner's tax levy. For example:

if budgets decrease even though the value of all the property in a taxing jurisdiction as well as the value of an individual piece of property remain the same, the tax on the individual piece of property will decrease;

if budgets and the value of an individual piece of property remain the same while the value of the property in the rest of a taxing jurisdiction decreases (due to a drop in land prices, for example), the tax on the individual piece of property will increase;

if budgets and the value of property in a taxing jurisdiction remain the same while the value of an individual piece of property increases (due to a new addition on a home, for example), the tax on that individual piece of property will increase.

The chart below illustrates the effect of changes made in property tax variables.

The Effect of Changes in Property Tax Variables On A Parcel of Property

If local government budgets **decrease**	AND	The value of property in the gov't. unit as a whole **remains the same**	AND	The value of the individual's parcel of property **remains the same**	**TAXES DECREASE**
If local government budgets **remain the same**	AND	The value of property in the gov't. unit as a whole **decreases**	AND	The value of the individual's parcel of property **remains the same**	**TAXES INCREASE**
If local government budgets **remain the same**	AND	The value of property in the gov't. unit as a whole **remains the same**	AND	The value of the individual's parcel of property **increases**	**TAXES INCREASE**

Even after the tax rate is established, the rate cannot be applied uniformly to all property because school districts tax agricultural property at a lower rate than nonagricultural property.

Limits on Property Taxes

Although budgets control the size of a political subdivision's taxes, there are limits on the amount of taxes that can be levied. First, tax rates may not be based on more than 60% of the value of a piece of property. This limit means that if a piece of property is valued at $100,000, only $60,000 of that amount is subject to property tax.

The second limit is on the rate per thousand dollars of value. Each unit of local government is limited in the dollars per thousand it may tax. For example, the maximum rate for cities is $45 per thousand, while the maximum rate for townships is $5 per thousand dollars of property value.

Total Property Taxes

Taxes levied on property in South Dakota increased 3.8% from 1987 to 1988. Taxes on agricultural property increased 2.6%, while nonagricultural property taxes increased 4.2%.

The following chart compares the 1988 effective tax rate in 27 of South Dakota's largest cities (nonagricultural property) and townships (agricultural property). The effective tax rate is the percentage of a property's sale price that will be paid in taxes. For example, if the effective tax rate is 2% the taxes on a home selling for $40,000 would be $800 per year. The information below is based on a parcel of property with a $40,000 selling price and is calculated for nonagricultural commercial and residential property and agricultural property.

In 1989, Dell Rapids had the lowest residential effective tax rate among the state's 27 largest towns.

Replacement of the Personal Property Tax

In 1979 personal property taxes were eliminated in South Dakota. Since then, the legislature has appropriated $40.7 million each year in general fund monies to replace personal property tax revenues lost to counties. The 1988 legislature appropriated an additional $2.91 million for a total of $43,654,104.

Sales To Assessment Ratio Analysis

One factor in the amount of tax levied on a parcel of property is the value assigned to the property. If, for example, the rate of tax is $4 per thousand dollars of value and the value of the property is determined to be $30,000, the tax will be $120. On the other hand, if the property is valued at $40,000, the tax will be $160.

The accuracy of assessments can be evaluated by comparing them with the actual sale prices of property. The Sales to Assessment Ratio Analysis in the following chart compares, by county, the assessed value of property with its real value, i.e., sale price. The ratio is expressed as a percentage and is found by dividing the assessed value by the selling price. Thus, a parcel assessed at a value of $32,000 and selling at $40,000 would have an assessment/sales ratio of 80%.

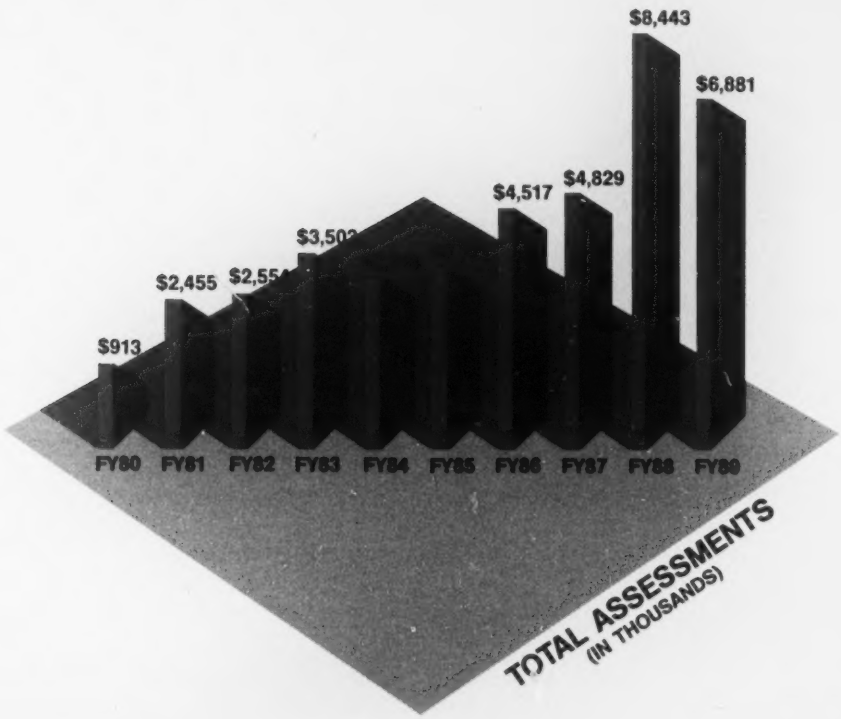
AUDITS

To insure that businesses are correctly reporting their taxes, the Department of Revenue performs regular audits on financial records. Audits may be carried out on any tax-paying license holder, in-state or out-of-state, large or small.

Audits result in the correction of errors made by businesses in the payment of taxes. These corrections meant an additional $6,880,925 in tax revenues (assessments and penalties) in fiscal year 1989.



Assessments have increased 87% over the past 10 years.

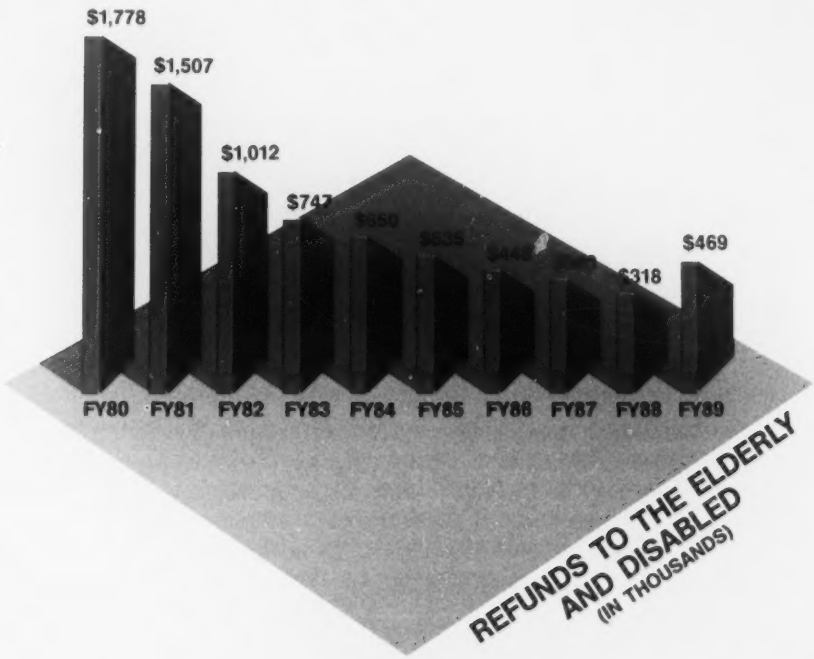
Tax refunds are an essential part of South Dakota's tax system. They apply to two groups: the elderly and disabled who are eligible for sales and property tax refunds and consumers using vehicles and equipment off of highways and roads who may receive motor fuel tax refunds.

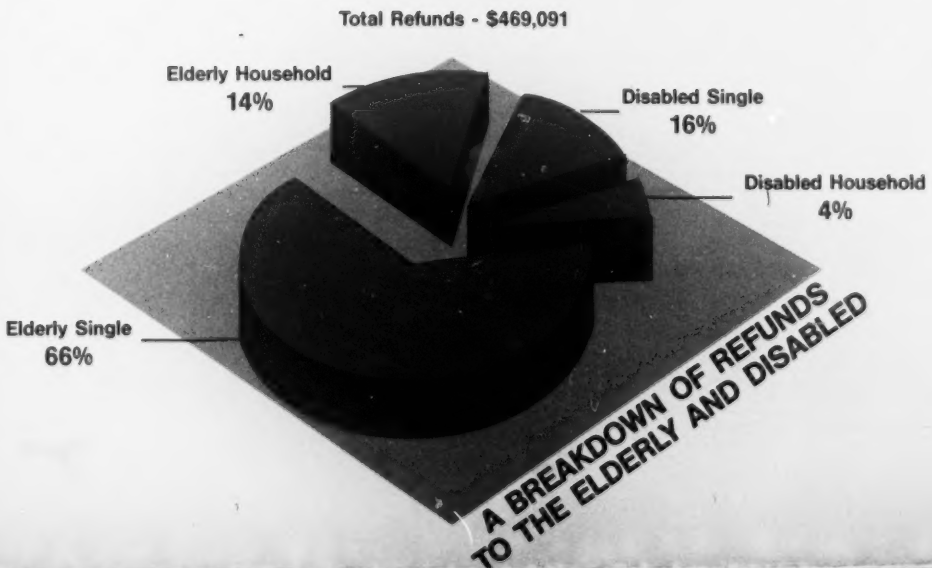
Sales and property tax refunds made to low-income senior or disabled citizens increased 29% in 1989.

As the chart below illustrates, refunds declined from 1980 to 1988. In 1989, however, the legislature relaxed eligibility requirements and refunds increased by 48%.

Refunds to the Elderly and Disabled



Tax refunds to the elderly and disabled have decreased by 74% since fiscal year 1980.



The number of refund applications by group in 1989 were:
Elderly single 2,778
Disabled single 674
Disabled household 195
Elderly household 585

Refunds by County

Tax refund dollars for the elderly and disabled affected citizens in every county. Minnehaha County had the largest number of participants with 478, followed by Pennington County with 304 and Brown County with 228.

The top five counties in the dollar amount of refunds were Minnehaha, Pennington, Brown, Shannon and Davison counties.

This list includes both property and sales tax refunds.

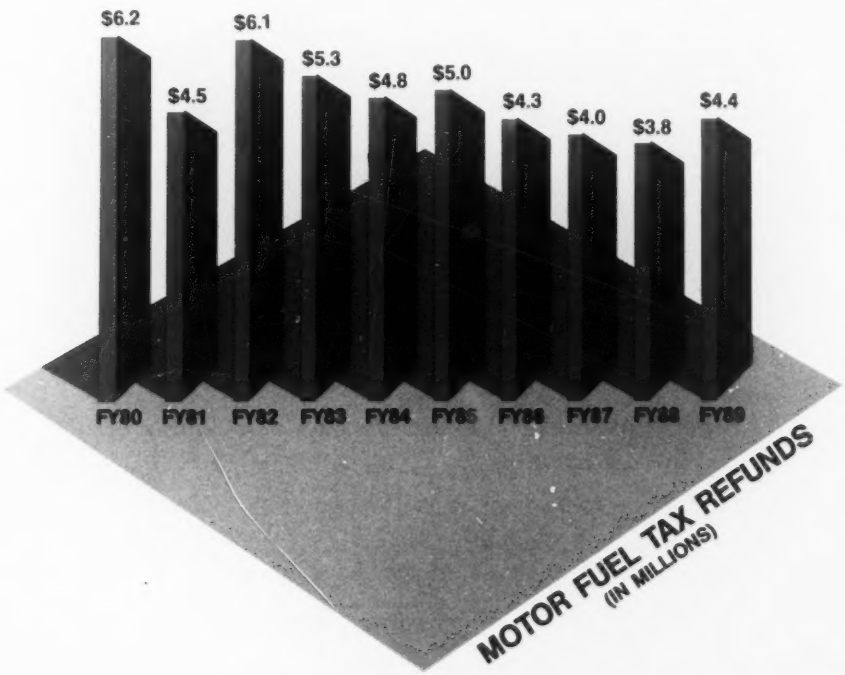
Motor Fuel Tax Refunds

Motor fuel used to operate agricultural and commercial equipment, other than aircraft, off of roads and highways is not subject to a fuel tax. Consumers documenting this off-highway usage are given a motor fuel tax refund. During fiscal year 1989, there were 15,953 refunds totaling $4,423,441. The average refund amounted to $277 in fiscal year 1989 as compared to $173 in 1988.

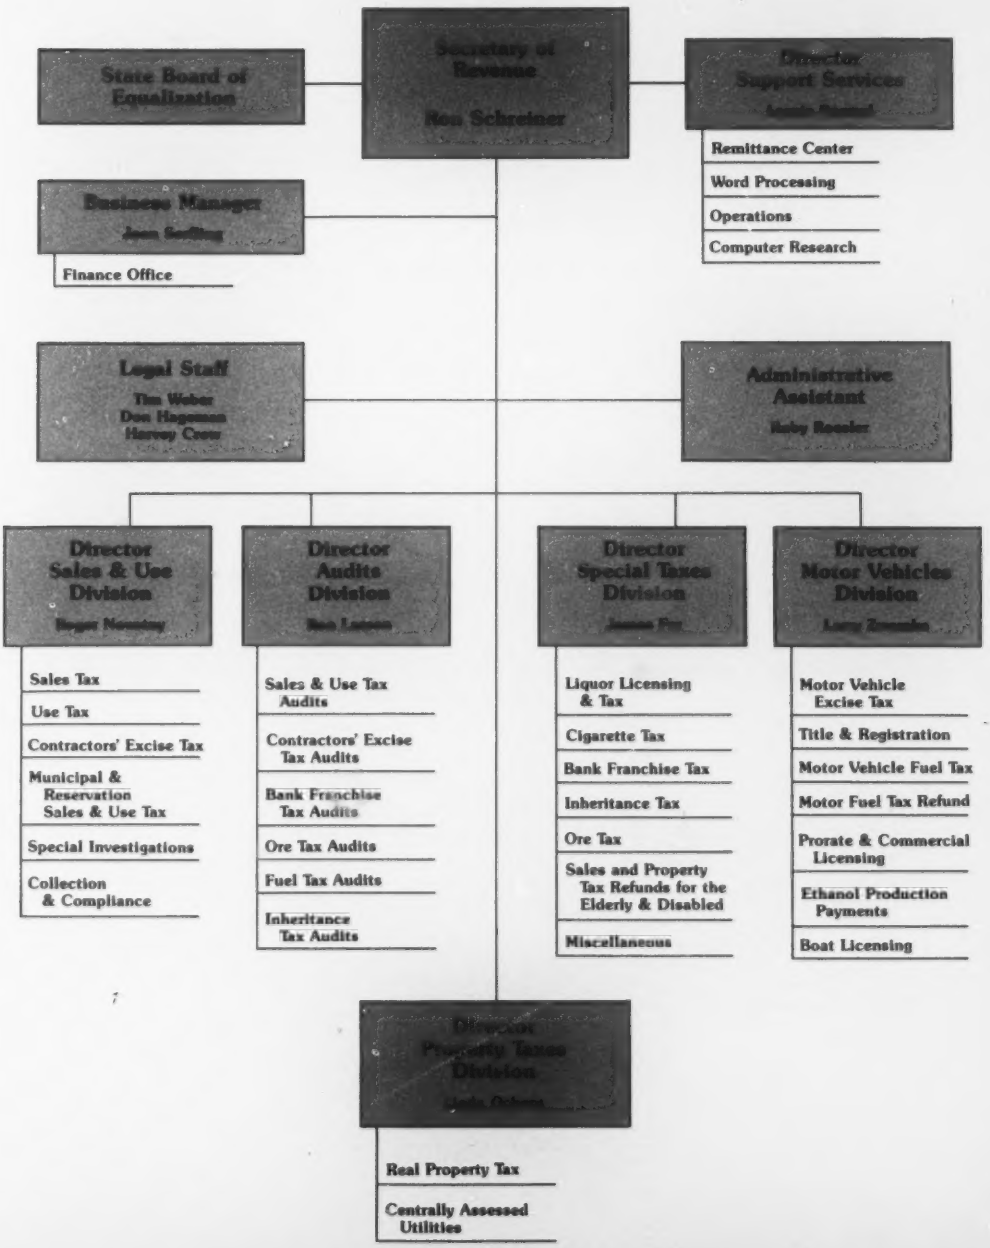


Motor fuel tax refunds peaked at $6.2 million in fiscal year 1980.

DEPARTMENTAL OVERVIEW

The administration of the 42 tax laws in force in fiscal year 1989 and the collection and distribution of the $496 million of tax revenues required 169 full-time employees. The total administrative costs were $9 million, of which $3 million were general fund dollars.

The Department of Revenue is organized into five divisions and the Office of the Secretary. While the department secretary, division directors and support staff are in Pierre, divisional field offices are located in six communities throughout the state.



Legal Services

The department employed three full-time attorneys in fiscal year 1989. During the course of the year, they represented the department in 28 appeals, conducted 64 hearings and provided ongoing legal counsel to the department.

Support Services

Support services has the responsibility of managing secretarial and computer services, budgetary data and the department's physical assets. Its purpose is to increase the efficiency of the operational divisions by providing them with the resources they require to meet their goals.

In addition, support services manages the department's Remittance Center located in Sioux Falls. The center processed over $539 million in payments in fiscal year 1989.

SECRETARY'S REPORT

November, 1989

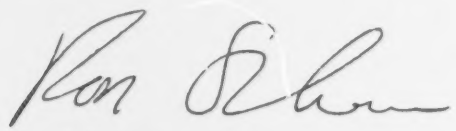
To the Governor, Legislature, and People of South Dakota:

Taxes and tax collection seemed to be in the news more during the past year than in recent memory. The recently defeated initiated property tax measure, Dakota Proposition II, has spawned several studies, and many proposed changes to the tax structure are being discussed in the legislative halls.

The tax system in South Dakota is complicated and difficult to understand. With this printing of the Annual Report of the South Dakota Department of Revenue, we hope to 1) aid those individuals who are studying taxes in South Dakota, and 2) help the State's citizens understand the taxes they pay by presenting information in a graphic, uncomplicated form.

We trust our goal has been met.

Sincerely,



Ron Schreiner
SECRETARY OF REVENUE

INTRODUCTION

Property taxes in South Dakota are part of a larger system of taxation that includes sales taxes, fuel taxes, motor vehicle licensing and a wide variety of special taxes. Property taxes are, however, local taxes. They are the primary source of dollars for school systems, counties, municipalities and other local government units. Consequently, their administration is a local responsibility. The authority of the Department of Revenue is limited to assisting local government units in making property tax assessments that are fair and in compliance with the law. The department does not collect or use property taxes.

How Property Taxes Are Applied

Property owners in South Dakota may be taxed by two or more of the following units of government: cities, counties, townships, school districts, water districts and, in some cases, units such as fire and sanitary sewer districts. There are, however, three steps that are common to the application of property taxes in each governmental unit.

(1) Establishing the Value of Property

The first step is to establish the value of all the property within the boundaries of each unit of government. Because all property is not of equal value, individual values are arrived at based on the price the property would bring if sold. This selling price, determined by the sale price of comparable properties and known as the true and full value, is what establishes the value of the property.

(2) Establishing the Amount of Tax

The second step is to determine the amount of taxes needed to meet the cost of operating a unit of government. The higher the cost of operating the city or school district, the larger the revenues required from property taxes. Revenues from property taxes, combined with other monies such as federal grants, must equal the size of the budget of the unit of government.

(3) Establishing a Tax Rate

The third step, establishing a tax rate to apply to individual pieces of property, is based on steps one and two. The tax rate for all property in a local unit of government is arrived at by dividing the value of all the property into the amount of the budget that is unfunded from other sources.

This calculation results in a tax rate expressed in dollars of tax per thousand dollars of property value, or "dollars per thousand." If the dollars per thousand were $4, the tax on a home valued at $50,000 would be calculated at $4 X 50 and would result in a tax of $200.

In practice, all the tax rates that apply to a property are added together, resulting in a single tax levy. This single levy, however, is always the product of two or more tax rates assessed by different government entities as illustrated on the top of the next page.

Local Units of Government Taxing A Hypothetical Parcel of Property

Property "X" taxed at a rate of $74.18 per thousand dollars of taxable value.

Unit of Government	Amount of Tax
School District Tax	$41.44 per thousand
County Tax	11.85 per thousand
City Tax	20.64 per thousand
Township Tax	0 per thousand
Water District Tax	0.25 per thousand
Fire District Tax	0 per thousand
Sanitary District Tax	0 per thousand
TOTAL	74.18 per thousand

Property Tax Variables

Three major variables affect the taxes on individual pieces of property:

1. the size of the combined budgets of the governmental units taxing the property;
2. the value of all the property in the governmental unit;
3. the value of the individual piece of property.

A change in any one of these three variables will change a property owner's tax levy. For example:

if budgets decrease even though the value of all the property in a taxing jurisdiction as well as the value of an individual piece of property remain the same, the tax on the individual piece of property will decrease;

if budgets and the value of an individual piece of property remain the same while the value of the property in the rest of a taxing jurisdiction decreases (due to a drop in land prices, for example), the tax on the individual piece of property will increase;

if budgets and the value of property in a taxing jurisdiction remain the same while the value of an individual piece of property increases (due to a new addition on a home, for example), the tax on that individual piece of property will increase.

The chart below illustrates the effect of changes made in property tax variables.

The Effect of Changes in Property Tax Variables On A Parcel of Property

If local government budgets **decrease**	AND	The value of property in the gov't. unit as a whole **remains the same**	AND	The value of the individual's parcel of property **remains the same**	**TAXES DECREASE**
If local government budgets **remain the same**	AND	The value of property in the gov't. unit as a whole **decreases**	AND	The value of the individual's parcel of property **remains the same**	**TAXES INCREASE**
If local government budgets **remain the same**	AND	The value of property in the gov't. unit as a whole **remains the same**	AND	The value of the individual's parcel of property **increases**	**TAXES INCREASE**

Even after the tax rate is established, the rate cannot be applied uniformly to all property because school districts tax agricultural property at a lower rate than nonagricultural property.

Limits on Property Taxes

Although budgets control the size of a political subdivision's taxes, there are limits on the amount of taxes that can be levied. First, tax rates may not be based on more than 60% of the value of a piece of property. This limit means that if a piece of property is valued at $100,000, only $60,000 of that amount is subject to property tax.

The second limit is on the rate per thousand dollars of value. Each unit of local government is limited in the dollars per thousand it may tax. For example, the maximum rate for cities is $45 per thousand, while the maximum rate for townships is $5 per thousand dollars of property value.

Total Property Taxes

Taxes levied on property in South Dakota increased 3.8% from 1987 to 1988. Taxes on agricultural property increased 2.6%, while nonagricultural property taxes increased 4.2%.

Taxes Levied By Local Units of Government

Each governmental unit levies its own property taxes to meet its budget. The following chart compares the total amount of tax levied by each unit of government.

* The difference in the totals in the two charts on this page is due to rounding.

The following chart compares the 1988 effective tax rate in 27 of South Dakota's largest cities (nonagricultural property) and townships (agricultural property). The effective tax rate is the percentage of a property's sale price that will be paid in taxes. For example, if the effective tax rate is 2% the taxes on a home selling for $40,000 would be $800 per year. The information below is based on a parcel of property with a $40,000 selling price and is calculated for nonagricultural commercial and residential property and agricultural property.

In 1989, Dell Rapids had the lowest residential effective tax rate among the state's 27 largest towns.

Replacement of the Personal Property Tax

In 1979 personal property taxes were eliminated in South Dakota. Since then, the legislature has appropriated $40.7 million each year in general fund monies to replace personal property tax revenues lost to counties. The 1988 legislature appropriated an additional $2.91 million for a total of $43,654,104.

Sales To Assessment Ratio Analysis

One factor in the amount of tax levied on a parcel of property is the value assigned to the property. If, for example, the rate of tax is $4 per thousand dollars of value and the value of the property is determined to be $30,000, the tax will be $120. On the other hand, if the property is valued at $40,000, the tax will be $160.

The accuracy of assessments can be evaluated by comparing them with the actual sale prices of property. The Sales to Assessment Ratio Analysis in the following chart compares, by county, the assessed value of property with its real value, i.e., sale price. The ratio is expressed as a percentage and is found by dividing the assessed value by the selling price. Thus, a parcel assessed at a value of $32,000 and selling at $40,000 would have an assessment/sales ratio of 80%.

LAND STATISTICS

South Dakota ranks 16th among the fifty states in total area. South Dakota has a total surface area of 77,116 square miles (49,354,248 acres). The total surface area of the state is composed of 75,952 square miles (48,609,280 acres) of land and 1,164 square miles (744,960 acres) of inland water.[1]

There are several units of government as well as private concerns that own land within South Dakota. Statistics are presented as to federal and state ownership of lands in South Dakota. Statistics as to county, township, and municipal ownership of lands in the state are not readily available, and therefore cannot be presented. Private ownership of lands in the state is presented in two categories: Indian and non-Indian.

STEPS IN THE DETERMINATION OF PROPERTY TAXES

The following is a brief step by step synopsis of the way in which property taxes (with the exception of centrally assessed properties) in South Dakota are determined.

Step #1

The full and true (assessed) value of all property in the state is determined by assessment on January 1.

Step #2

Early in May, each county Board of Equalization sets a percentage which will be the percent that taxable value will be of full and true value, not to exceed 60 percent. At that time the total taxable value in each taxing jurisdiction within the county will be determined.

Step #3

The various taxing jurisdictions (county, school district, city, etc.) within the county submit their budgets to the county auditor. This is generally in October.

Step #4

Tax levies (within statutory limits) for each taxing jurisdiction are determined by dividing the tax levy request by the taxable value within the taxing jurisdiction and multiplying the result by 1,000. For example, if the full and true value of all property within a city is $10,000,000 and the county Board of Equalization determines that 40 percent of full and true value ($4,000,000) will be taxable value, and the city has a tax levy request of $100,000, the tax levy is computed as follows:

taxable value = 40% x full and true value
taxable value = 40% x ($10,000,000) = $4,000,000
tax levy = (tax levy requested divided by taxable value) x 1,000
tax levy = (100,000 divided by $4,000,000) x 1,000 = 25.00 dollars per thousand

Step #5

Taxes are computed by multiplying the full and true value times the taxable percent times the tax levy. For example, if a person has property with a full and true value of $30,000 his city taxes would be computed as follows:

taxable value = 40% x full and true value
taxable value = 40% x $30,000 = $12,000
taxes = taxable value x (tax levy divided by 1,000)
taxes = $12,000 x 25/1,000 = $300

Taxes are due on January 1 of the year following the assessment. One-half of the taxes must be paid by May 1 of the year following the assessment and the remaining half must be paid by November 1 of the year following the assessment. All property taxes are paid to the county treasurer.

EXPLANATORY NOTES

PROPERTY TAXES COLLECTED FROM ALL SOURCES: Upon receipt of property taxes, the county distributes the money back to the different taxing entities. The taxing entity and the amount of tax distributed depend on the property for which taxes were collected. The table shows total amount that was to be collected for each type of taxing district, the amount and the percent that was collected.

AMOUNT OF TAXABLE VALUATION, LEVIES AND TAXES FOR MUNICIPALITIES: All incorporated municipalities within the state are listed. The taxable valuation and the levies applied to that valuation are listed and used to determine total amount of property taxes within the municipality. The column **ADJUSTED VALUE** is the value for school purposes. In these cases, all levies are applied against the **TAXABLE VALUE,** except the school levy, which is applied against the adjusted value.

VALUATIONS: Each county is listed showing total full and true (assessed) valuation of real property and the taxable valuation of utility companies.

COUNTY WARRANTS AND ENCUMBRANCES: Expenditures for specified purposes and total county expenditures.

TOWNSHIPS: This valuation and tax is of all organized townships in the state, listed by county. (There are eight counties that do not have any organized townships.)

TWENTY-SEVEN LARGEST CITIES: A comparison of the effective tax rate of the twenty-seven largest cities in the state. The effective tax rate is the percent of the selling price which a person would pay for property taxes.

PERSONAL PROPERTY TAX REPLACEMENT: Each county and the amount the entire county receives for the fiscal year are listed. This money, when received by the county is distributed to county, city, school and other funds.

ABSTRACT CLASSES AND TAXES: County full and true (assessed) valuations are shown, broken down by abstract class. Tax levy and taxes are shown for each taxing entity within the county.

1988 RECAP INFORMATION - TAXES PAYABLE 1989:

COUNTY: This levy and tax is the total amount for **county** purposes only.

SECONDARY ROAD: This is applicable to unorganized townships only.

SUBDISTRICTS OF SOUTH DAKOTA CONSERVANCY DISTRICTS: This is a special tax levied and used by the Subdistrict Conservancy Districts only. (Not all counties or part of counties participate.)

TELEPHONE OUTSIDE CORPORATE LIMITS: This carries a special levy and the tax collected goes into the County General Fund. This is a tax paid by telephone companies.

SPECIAL ASSESSMENTS: Includes assessments such as sidewalks, curb and gutter, weed mowing, etc.

CITIES AND TOWNS: This levy and tax is the total amount for **city** purposes only.

SCHOOLS: Apply the ag levy against the ag valuation and the non-ag levy against the non-ag valuation. These levies include General Fund plus Capital Outlay and Special Education if a levy has been made for these. Due to differences in Adjustment and Bond levies for overlapping school districts, these have not always been included in the stated levies. (If the levy for bond is uniform over the whole school district, then it has been included.) **Taxes** are the total for both ag and non-ag amounts and also include taxes for any district with a Bond or Adjustment levy.

*Designates an overlapping school district and taxable valuation may have been adjusted for school purposes only.

MOBILE HOMES: This valuation and tax is not included in the above explanations, but the tax is apportioned as other taxes and considered as Other revenue when setting up the budget.

To determine a total tax levy for any given district, you will need to add the levy for schools (ag or non-ag), city, county and any special levy that might apply to that district. In most instances, there will be an ag and non-ag levy.
